

DESIGN PROBLEM STATEMENT

Not necessarily you need to have awesome design skills, or you need to have the knowledge of some dope software. Use any tool you want, to awe-struck us with your creativity. | Compress your submissions and your other works (if you have any) and incase you have any hand drawn stuffs, scan it and include it with your zip file. | The project files must be compressed into a single file in a common format (zip/rar/tar.gz) and strictly named as ENROLLMENT NUMBER_DESIGN.zip ; for e.g. 14116020_DESIGN.zip . Only the last entry will be considered incase of multiple submissions per candidate.

Last date for submission is **14th Jan - 11:59 PM**

SECTION A

VarunX runs a tourism and travelling agency and wants to expand his business prospects by taking his business online and launch a webapp of his agency. Design a **web app interface, logo and promotional material (banners or posters)** for VarunX's agency.

Or the same problem statement for an E-learning web app.

If there is anything you've designed in the past and are proud of, share it with us.

(Keep it in a folder named "Personal Projects")

SECTION B

- Your 3 favorite websites and why you like them.
- Describe an app with the worst ever interface.
- Where do you get your design inspiration from?
- A color palette you think is suitable for a design that involves:

- a. online banking app.
- b. music streaming app.

Also reason for choosing it.
